CHOCOLATE BISCUIT CAKE

- ❑ First pour 1.5 liters of milk in the pot, then add 2 packages of pudding and mix it. When it starts to boil, lower the heat and then move it from the stove and start putting the biscuits in a wide Pyrex side by side. When one row is done, put some of the pudding on top until the biscuits are covered and do this until all your biscuits are done. When you have finished, for the top decoration you can put some candy sprinkles and coconut powder. Before you eat it, its best if you keep it in the fridge for an hour or longer.
